🔗 Hoang Thien Portfolio

Summary

Fourth-year Software Engineering student at UEF with a solid foundation in algorithms, data structures, and web development. Active competitive programmer with multiple awards in university coding contests and participant in the Vietnam Student Informatics Olympiad. Experienced with Java, C, C#, ASP.NET, MVC, Web API, and relational databases (MS SQL Server, MySQL). Looking for a backend or web development internship where I can write clean, maintainable code and contribute to real-world projects.

Education

GPA: 3.12/4 09/2022 – Present
Ho Chi Minh City University of Economics and Finance - UEF ⚡ Ho Chi Minh city, Viet Nam
B.S. in Software Engineering

Awards

2nd Place – FIT Code Contest 2025, UEF ⚡	25/10/2025
3rd Place – FIT Code Contest 2024, UEF ⚡	13/09/2024
3rd Place – FIT Code Contest 2023, UEF ⚡	16/09/2023
3rd Place – UEF Math Olympiad 2023, UEF ⚡	11/11/2023
Participant – Vietnam Student Informatics Olympiad ⚡	

TECHNICAL SKILLS

Programing language: Java, C, C#	Web & Frameworks: ASP.NET MVC, Web API, Java Servlet	Databases: MS SQL Server, MySQL	Tools & Practices: Git, MVC pattern, OOP, RESTful APIs
--------------------------------------------	--------------------------------------------------------------------	-------------------------------------------	----------------------------------------------------------------------

Project-Based Learning

Private Clinic Management System – Web Application Development ☈

09/2025 – 10/2025

A clinic management system designed to manage doctors, receptionists, and patients efficiently. Supports appointment scheduling, patient records, and staff management with role-based authentication and a layered architecture for scalability and maintainability.

- Programming Language: Java, html, css
- Framework: ASP.NET ☈ MVC, Entity Framework
- Database: Microsoft SQL Server / T-SQL
- Architecture: 3-layer architecture (UI / Business Logic / Data Access)
- Features:- Admin module for managing doctors, receptionists, and patients- Doctor and receptionist accounts with secure authentication and role-based authorization- CRUD operations for appointments, medical records, and schedules- Stored procedures and migrations for database consistency
- Tools / Others: Git, Visual Studio, SQL scripts for schema and data management

Online Sales & Inventory Management System (ASP.NET Core) ☈

12/2025 – 01/2026

Full-stack admin web app for product catalog, purchasing, invoicing, inventory tracking, and profit reporting.

- Built an admin web app for sales, purchasing, inventory tracking, and profit reporting.
- Tech: ASP.NET ☈ Core MVC (.NET 8), EF Core + Microsoft SQL Server; layered architecture & DI.
- Security: ASP.NET ☈ Core Identity with policy-based authorization (RBAC/ permissions).
- Reporting: Excel exports for management dashboards using ClosedXML.
