🔗 Portfolio: Hoang Thien Portfolio

Summary

Final-year Software Engineering student with 4+ months of hands-on internship experience developing warehouse management features using C#/.NET 8, Blazor, Telerik UI, and SQL Server. Experienced in building backend and full-stack applications with ASP.NET Core, EF Core, REST APIs, React, authentication and authorization, and relational databases. Practical experience with business workflows, transactions, caching, RBAC, Excel import/export, reporting, and SQL Server stored procedures and views. Seeking a Fresher .NET Developer role focused on backend or full-stack development.

TECHNICAL SKILLS

Languages

C#, SQL, JavaScript, TypeScript, HTML/CSS

Backend Development

.NET 8, ASP.NET Core MVC, ASP.NET Core Web API, Blazor, Entity Framework Core, ASP.NET Identity, JWT, REST APIs

Database

SQL Server, PostgreSQL, MySQL/TiDB, SQLite, Stored Procedures, Views, Relational Database Design, EF Core Code First, Migrations

Frontend & UI

React, Razor, Telerik UI for Blazor, Bootstrap, Ant Design

Tools & Development Concepts

Git, GitHub, Role-Based Access Control (RBAC), Transactions, Caching, Validation, ClosedXML/OpenXML, Telerik Reporting, Debugging

Professional Experience

Full-stack Developer Intern

TKSolution

Warehouse Management System (WMS)

04/2026 – 09/2026

Ho Chi Minh City,

Vietnam

- Developed master-data, inbound, and outbound warehouse modules using C#/NET 8, Blazor Server, Telerik UI, and SQL Server, following the project's Entity-Controller-Cache-Razor structure.
- Implemented Excel import/export workflows with cached master-data lookups, row-level validation, SQL transactions, commit/rollback handling, error reporting, action-history tracking, and cache synchronization.
- Implemented and customized SQL Server stored procedures for duplicate-document validation, master-data and transaction-date checks, and inventory availability by warehouse, product, and transaction date; integrated Telerik Reporting for inbound and outbound document previews.

Projects

Facebook Group Posting Automation Tool	04/2026 – Present
<i>Windows-based automation application for scanning and filtering Facebook groups, managing post content and images, and scheduling recurring posts.</i>	
• Implemented Playwright-based browser automation with concurrent worker tabs, posting workflows, Activity Log verification, duplicate-post prevention, and persistent posting states. • Built a .NET 8 system-tray host to manage the Node.js server and Chrome runtime, supporting background execution, dynamic ports, automatic restart, and Windows startup. • Implemented automated tests covering scheduling, concurrency, posting verification, state management, and browser automation.	

Education

GPA: 3.16/4.00 All Coursework Completed	09/2022 – Present
<i>Ho Chi Minh City University of Economics and Finance - UEF</i> 	HCMC Viet Nam
B.S. in Software Engineering	

Awards

2nd Place – FIT Code Contest, UEF 	10/2025
3rd Place – FIT Code Contest, UEF 	09/2024
3rd Place – FIT Code Contest, UEF 	09/2023
3rd Place – UEF Math Olympiad, UEF 	11/2023
